EPA Region 5 Records Ctr.

383926

Dear Mr. Schultz:

The United States Environmental Protection Agency (U.S. EPA) had a site assessment prepared for the Satralloy/Satra Concentrates site near Steubenville, Ohio, to determine the need for a Federal removal action. A copy of this report is enclosed for your files or distribution to district staff as you see fit.

Based on the available data and information, U.S. EPA did not feel that a Federal lead removal was warranted at this site, however, the report raises some other environmental concerns. U.S. EPA recommends that the Ohio Environmental Protection Agency, in concert with the local agencies, further investigate the quality of the groundwater near this site and consider possible corrective actions to preclude future problems. If additional information is obtained which indicates a need for a removal action, please notify this office.

This site has also been submitted for inclusion in the U.S. EPA CERCLIS data base file system.

If you have any questions or concerns regarding this matter, please contact me at (313) 692-7661.

Sincerely,

Ross E. Powers, Chief
Response Section I
